

I've harvested an animal and want a Shoulder mount, now what?

DO NOT HANG THE ANIMAL BY ITS NECK OR ANTLERS.

1. Be sure your animal is properly tagged AND registered.
2. Try your best to keep your animal as clean as possible from dirt, blood, or fluids. Avoid dragging as this will cause hair damage.
3. Do NOT hang the animal by its neck or antlers.
4. Ideally, the animal should be brought to us as soon as possible. Call (608)-558-6831 to schedule a drop-off time.
5. When cutting the cape, make sure to cut well behind the front legs to include the arm pit and belly area to ensure there is enough cape for mounting.
6. **If you do not feel comfortable skinning, we will skin on site for a \$50.00 fee.**
7. Place the cape with the head attached in a garbage bag and deliver immediately or freeze.
8. **At the time of drop off, we will have you fill out our intake form and collect a 50% non-refundable down payment (cash, check or card).**
9. Follow the diagrams for skinning. DO NOT SKIN ANYTHING PAST THE HEAD AND NECK JUNCTION. THE TAXIDERMIST WILL SKIN OUT THE FACE.

As you carefully continue skinning, the hide will get tougher to skin as you reach the head and neck junction. When you can no longer skin, remove the head from carcass approximately 3-5" below the head and neck junction.
